Goslyn GOS320

100 GPM Automatic Grease Removal Device

Goslyn products outperform other systems on the market

Goslyn is a leading innovator in grease removal technology, specializing in sustainable, environmentally-friendly automatic grease removal devices and related solutions.

Our patented, high-efficiency, cost-effective systems offer a range of unique features and benefits that set Goslyn apart from similar products on the market.

Efficiency and Effectiveness

In the foodservice industry, significant amounts of fats, oils, and greases (FOG) mix with water and are flushed down the drain. This FOG-polluted water is costly and detrimental, as it clogs drains, burdens sewage systems, and pollutes the environment.

So why not stop FOG at its source?

Along with FOG, Goslyn systems consistently achieve a 96.4% grease removal efficiency, outperforming competing systems in the market.

Convenient Compact Build

The Goslyn GOS320 features a unique system design that allows for multiple discharge configurations while maintaining a small footprint, making it easy to install and retrofit.

Durability and Low Maintenance

Customers across various industries leverage Goslyn solutions to ensure they have effective and reliable systems in place. Thanks to the durability and longevity of our products, customers also benefit from a positive return on investment.

- Heavy-duty 14 gauge, grade 304 stainless steel exterior construction
- No moving parts = less maintenance
- 5 year limited warranty

GOS320 Details

Part No.	139532
Flow Rate	100 GPM
Height	34.96" (888 mm)
Length ¹	50.15" (1274 mm)
Width ²	23.68" (602 mm)
Height to Inlet Center ³	29.07" (738 mm)
Height to Outlet Center ³	21.81" (554 mm)
Weight	260 lbs

1. Length does not include Silt Valve.
2. Width does not include 3.5" for cassette and oil shroud.
3. Inlet/Outlet height is measured to the center.

Typical Applications

Goslyn GOS320 meets (and exceeds) industry codes and standards including UL, IPC, UPC, IRC, NPC, ASME A112.14.3, ASME A1123.14.4, and PDI G101.
